

Unit 18 / Hunting

(See Unit 18 Yukon-Kuskokwim Delta map)

Unit 18 consists of that area draining into the Yukon and Kuskokwim rivers downstream from a straight line drawn between Lower Kalskag and Paimiut, and the drainages flowing into the Bering Sea from Cape Newenham on the south to (and including) the Pastolik River drainage on the north; and Nunivak, St. Matthew, and adjacent islands between Cape Newenham and the Pastolik River.

Special Provisions:

- The **Kalskag Controlled Use Area** is closed to the use of aircraft for hunting any ungulate, bear, wolf, or wolverine, including the transportation of any hunter and ungulate, bear, wolf, or wolverine part. The controlled use area consists of that portion of Unit 18 bounded by a line from Lower Kalskag on the Kuskokwim River, northwesterly to Russian Mission on the Yukon River; then east along the north bank of the Yukon River to the old site of Paimiut; and then back to Lower Kalskag. However, this does not apply to transportation of a hunter or ungulate, bear, wolf, or wolverine part by aircraft between publicly owned airports in the Kalskag Controlled Use Area or between a publicly owned airport within the controlled use area and points outside the controlled use area.
- No resident tag is required for taking brown bear in Unit 18, provided that the hunter has a State registration permit prior to hunting. See page 23 for bear sealing requirements.
- You may take caribou from a boat moving under power in Unit 18.
- Prior to Oct. 1 all edible meat from caribou and moose harvested in Unit 18 must remain on the bones of the front quarters and hind quarters until the meat is removed from the field or is processed for human consumption.

CUSTOMARY & TRADITIONAL USE DETERMINATION	HARVEST LIMITS	OPEN SEASONS
